UNIVERSITY OF SÃO PAULO [DEPARTAMENT/SCHOOL] [GRADUATE PROGRAM]

Daniel Vartanian

{tesesusp}: a Quarto format for USP theses and dissertations

Daniel Vartanian

{tesesusp}: a Quarto format for USP theses and dissertations

Original version

[DISSERTATION/THESIS] presented to the [SCHOOL/DEPARTMENT] at the University of São Paulo, as part of the requirements for the degree of [TYPE OF DEGREE] by the [GRADUATE PROGRAM].

Area of Concentration: [AREA OF CONCENTRATION].

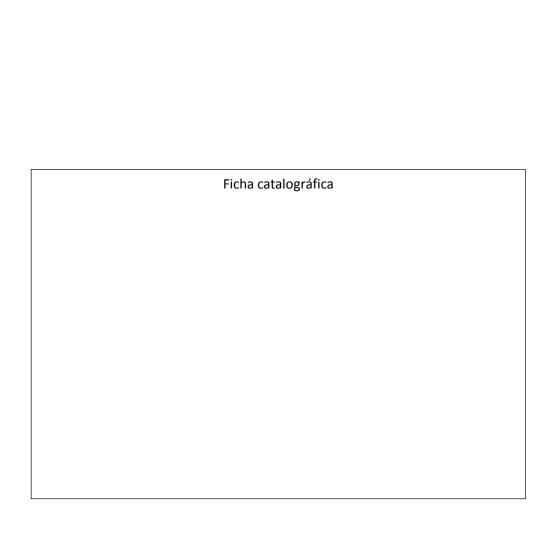

Revised version incorporating the changes requested by the examining committee on [DATE]. The original version is held in the reserved collection at the [SCHOOL/DEPARTAMENT] Library and in the Digital Library of Theses and Dissertations of the University of São Paulo (BDTD-USP), in accordance with Resolution CoPGr 6018, dated October 13, 2011.

Supervisor: Prof. Dr. [SUPERVISOR'S FULL NAME]

Co-Supervisor: Prof. Dr. [CO-SUPERVISOR'S FULL NAME]

"The activity can be represented by a *general schema of problem-solving by the method of imaginative conjectures and criticism*, or, as I have often called it, by *the method of conjecture and refutation*. The schema (in its simplest form) is this

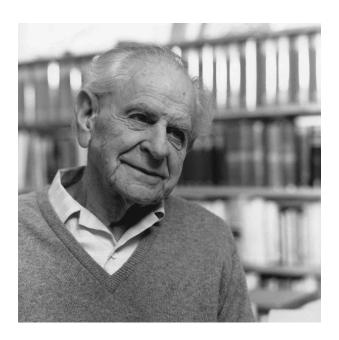

$$P_1 \rightarrow TT \rightarrow EE \rightarrow P_2$$

Here P_1 is the *problem* from which we start, TT (the 'tentative theory') is the imaginative conjectural solution which we first reach, for example our first *tentative interpretation*. EE ('*error- elimination*') consists of a severe critical examination of our conjecture, our tentative interpretation: it consists, for example, of the critical use of documentary evidence and, if we have at this early stage more than one conjecture at our disposal, it will also consist of a critical discussion and comparative evaluation of the competing conjectures. P_2 is the problem situation as it emerges from our first critical attempt to solve our problems. It leads up to our second attempt (*and so on*). A satisfactory understanding will be reached if the interpretation, the conjectural theory, finds support in the fact that it can throw new light on new problems — on more problems than we expected; or if it finds support in the fact that it explains many sub-problems, some of which were not seen to start with. Thus we may say that we can gauge the progress we have made by comparing P_1 with some of our later problems (P_n , say)."

(Popper 1979, 164)
